

**Location:**  
Senakin, South Kalimantan

**Value:**  
US\$515 Million

**Client:**  
PT Arutmin Indonesia

**Contract Type:**  
Total Mine Services Schedule of Rates for Coal Loaded to Barge

**Duration:**  
June 2000 to End of Mine

#### Description of Works

Thiess Indonesia secured the long-term operational contract for the Senakin Coal Mine in South Kalimantan in 2000 with mine owners PT Arutmin Indonesia. The alliance was further extended in 2003 for the life of the mine.

#### Thiess' Role

As the sole contractor operating on site, Thiess Indonesia provides total mine solutions from:

- Mine and waste planning
- Clearing
- Overburden removal
- Coal crushing and washing right through to site environmental rehabilitation

The scope of Thiess Indonesia's works also include operation and maintenance of two washplants to process run of mine (ROM) coals, plus transport of product to two river ports and loading of barges.

#### Project Delivery

Thiess Indonesia's current annual coal production on site is 5MT of coal from 50M BCM of overburden.

The total workforce including administration, mining operations and maintenance personnel is more than 1000. A further 600 subcontract personnel are also engaged on site.
