

Location:
Berau, East Kalimantan

Value:
Total US\$12 Million

Client:
PT. Berau Coal

Contract Type:
Build Own Operate Transfer (BOOT)

Duration:
June 2000 to October 2006

Description of Works:

Thiess Indonesia was contracted in June 2000 for engineering, procurement and construction of a coal loading and barge out facility in Berau Coal Mine, North Kalimantan. Thiess Indonesia was also awarded the operations contract for the facility up until 2006.

The project was located in the Berau River delta in the North Eastern part of Kalimantan, approximately 300km north of the provisional capital of Samarinda. The works included design site, preparation and land clearing, all civil works for stockpile, foundations and tunnels, truck load out station, and conveyors.

At full capacity, the coal stockpile conveyors could hold a 200,000 tonne stock pile and covered a distance of 1.6 km to existing barge loader.
