Lumpsum work packages

**Duration:**  
2004 – On going

#### Description of Works

Thiess Indonesia has a long standing association delivering construction services to PT INCO, one of the world’s premier producers of nickel located in Soroako, South Sulawesi. Thiess Indonesia has been working there since 1996.

#### Thiess’ Role

Currently, Thiess Indonesia provides construction services to the site. Recent works have included:

- Kiln 3 ESP and multi cyclone intallation
- Q3 shutdown kiln and drying area
- Chemical warehouse
- MEM Undercarraige Shop
- HSFO Tank demolition
- Process Plant structural refurbishment
- Kiln 1, 2 & 500T bin foundations
- Switchgear & transformer installation

Average value of a package of work awarded over the past 12 months is US\$300K.

#### Project Delivery

There are currently around 40 long term TCI staff and 300 non-staff personnel on site. TCI is committed to continued support of INCO and they progress with their planned expansion plans of Bahadopi, coal conversion and transportation corridor upgrade.

Past projects of significance at the site have included the US\$30 Million expansion project in 1997 and the Balambano Hydro Power Project valued US\$72 Million.
